
Fact sheet for service providers (non-contractual partners) in connection with living donations

What information must the donor's invoice contain?

The donor's invoice hardly differs from a normal one at all. It must include the following:

Patient:	Donor
Remarks:	Donor examination, including recipient's details (first and last names, date of birth)
Cost-bearing party/guarantor:	Recipient's health insurer <i>including recipient's policy number</i>
Type of remuneration:	<i>Tiers payant (TP)</i>

Please do **NOT** send the invoice to the donor's health insurer. The costs arising in connection with the donation are borne by the recipient's insurer.

Please send your invoices to transplantation@svk.org and include the recipient's details.
